**Weekly Vineyard IPM Scouting Summary**

**Report for the week of August 17, 2006**

**Japanese Beetle Notes:**
**Downy Mildew Notes:**

**Leafhopper Notes:**
**Other Disease Notes:**

**Disease Level Rankings:** None, Trace, Low, Moderate, High, Very High

**Current Growth Stages:**

**Growing Degree Days** (Base 50)

**Previous Year GDDs on August 20 (March 1 Start):**

This report is a summary of weekly scouting from winegrape and juicegrape vineyards in southwest Michigan. It should be used only as a general guide, because pests vary greatly in their abundance from site to site. Scouting your own vineyards is the best way to know whether pest problems are developing in your farm.
